What Our Customers Are Saying . . .

"My customers really like how easy it is to find everything. They keep saying 'you've got everything on here', commenting on how much inventory I'm carrying...and really, my truck's not as full. I have more inventory on my other truck and this truck is doing the same volume."

- Frank Machado, Sacramento, CA

Integrated Mobile Solutions

Easily organize your product lines in the MTS 3000 shelving display and storage areas

The Diagnostics Area has a video capability for showing the Snap-on Modis system

The MTS 3000 system provides plenty of hidden storage areas

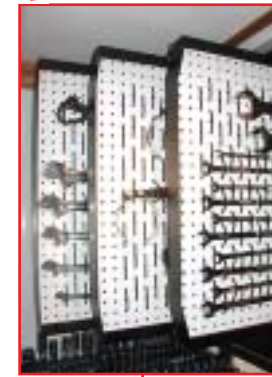

The Hand Tool display area is designed to optimize space while providing easy viewing

The socket display uses color coding (red) for standard and (blue) for metric sets

Sliding product pages maximize wall space and color lacing differentiates standard from metric

The 12-inch wide carpeted hammer rack has adjustable velcro shims for keeping tools secure

Operate the entire MTS 3000 electrical system from a convenient wall mounted control panel

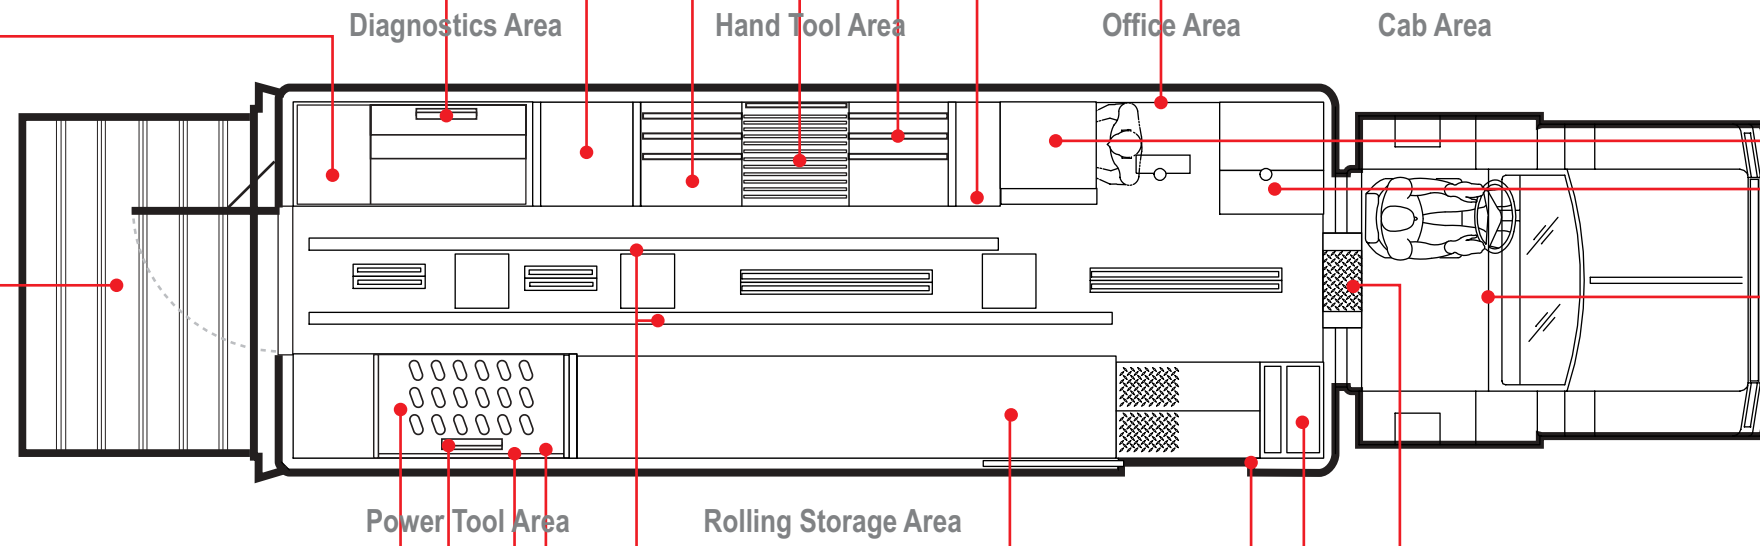

Your mobile office has plenty of room for laptop computer, printer, sliding brochure rack, metal storage drawers, portable broken tool drawer, and formica flip-down writing surface for customer orders and receipts

A flat screen 17-inch LCD monitor, located over the repair area with stainless steel table top, shows digital promotional videos or presentations throughout the mobile tool store

A 2,000 lb capacity, 72-inch Walco all aluminum cam closure liftgate with flip-out extension and cart stop

The cab has a utility shelf and 3/16-inch thick, black face board for added storage and display

A variety of cordless power tools are stowed and displayed in durable foam cutouts

A 15-inch LCD monitor shows Snap-on product promotions or training videos

Air tools are displayed on a wall-mounted rack system with quick release connectors

A built-in air supply with quick disconnect provides easy air tool demonstration

Adjustable overhead track lighting fixtures add emphasis to displays and signage

The large rolling storage area will handle a combination of modular lighted rolling shelves or the Snap-on tool boxes

Electric dead bolt door lock mechanism operated by the driver for added security

A combination display and storage module featuring a lighted knife case, creeper storage, and shelving offers premium merchandising of your best sellers or special promotions

The cab/chassis has a convenient walk through with flexible accordion boot and fabric cover, 1/4-inch diamond plate for kick protection, and lockable service plug for added security
