

# Introducing the XLerator Diagnostic Display from LDV

*"It helps me to organize and merchandise these high-end tools and draws customer interest."*

- Keith Koenen, WI

**1,688 Snap-on Franchisees added the RAK-PAK Power Tool Display to their Mobile Tool Store to help promote and sell more Power Tools!**

**Now you can promote Snap-on Diagnostics equipment the same way!**

Much like the Power Tool Display, the XLerator Diagnostics Display easily mounts on two vertical slotted E-tracks and can be located anywhere you have wall space to match its 50-by-27-inch size. This attention-grabbing retail display helps you organize and merchandise the Snap-on MODIS, SOLUS Pro, Vantage Pro, and ETHOS hand-held diagnostic products and accessories.

The display has two 24- by 12-inch black lace boards with two-inch deep metal shelves above four padded product cradles. A video-access port in the center makes mounting an LCD monitor easy so you can play promotional videos or demonstrate diagnostic product features and displays. Get this Diagnostic Display for your Mobile Tool Store Today!
