

Interior Display Drawers

Now you can organize and merchandise your hand tool product lines more effectively with LDV's Display Drawers.

These heavy-duty aluminum drawers come in two interior sizes (21 and 28-inch widths) and are fully adjustable within the Versaflex interior. You can organize complete tool sets like ratchets, wrenches and screwdrivers as well as larger boxed sets.

Customers will not strain to look under shelves; to open the drawer simply release the hidden drawer latch and pull. The drawer is designed to fully extend into the aisle. Your customers can view your

products without having to strain or bend over. Beneath the drawer is hidden storage for additional tool sets and complimentary products. The inserts and dividers keep your tool sets neat, organized and separated to avoid damage.

For more information on the Display Drawers, please contact an LDV Parts Specialist at 1-800-558-5986.
