

# Detachable Interior Display Panel

**The Detachable Interior Display Panel gives you a modular merchandising system to organize your Snap-on inventory.**

Merchandising your Snap-on inventory on the ceiling of a Mobile Tool Store has always been a challenge. Customers strain their neck to find ceiling mounted tools to make purchasing decisions is difficult at best. Now there is a better way to merchandise your wall- and ceiling-mounted tools.

The XLerator Detachable Display Panel from LDV offers you a well-organized merchandising system to allow your customers to make faster buying decisions and have a more satisfying shopping experience.

The XLerator Detachable Display Panel system features a modular frame and removable ceiling panel assembly (PN # 68160040). The frames (18-inches by 18-inches by 3-inches) feature a hook-hinge-release hardware system that allows for easy install or removal of the durable pegboard panels.

Press the release tab and the board can be removed from the frame. Now you can carry the product board to customers or rearrange product locations throughout your Mobile Tool Store easily and quickly.

You can use the hidden storage space behind the removable panel for additional inventory.
