

DVD plug in. To get the sound to come through stereo for DVD player the stereo must be in Aux mode.

The sound from the laptop will come out the speakers on your laptop. An adapter is available to allow laptop sound through the stereo speakers if desired.

A/B box selection
 Modis scanner: select A
 Laptop: select B

NOTE:
 When playing DVD: If using 1000watt inverter it must be chassis grounded or can cause high frequency static through radio.
