BRING TESTING AND VACCINE ADMINISTRATION TO THE CITIZENS THAT NEED THEM.

LDV has developed and implemented several mobile solutions to help your organization set up mobile testing sites and vaccination distribution quickly and efficiently.

These custom vehicles and trailers can be upfit with patient rooms, exam tables or chairs, pressurized water supply systems, medical grade refrigerators, sharps containers and more.

Investing in a COVID-19 response vehicle helps your response today but can be repurposed tomorrow as a clinic when needed.

TOTAL COVID-19 CASES*

25,152,433

+133,913 NEW CASES

TOTAL DEATHS*

419,827

+1,891 NEW DEATHS

** As of January 27, 2021*

COVID RESPONSE TRAILER - Medium

The trailer shown here was designed and built to be a mobile testing trailer specifically for COVID-19 response. The 24ft. trailer features aluminum construction, tandem 5,200lb. axles, horizontal sliding windows, and a 7kW Onan Commercial Quiet generator.

Additional features include stainless steel fold-down counter tops, aluminum cabinetry, (2) 68" fold-down sofas (2), half bathroom with hot water heater and more. There are also fresh, grey and black water tanks installed as well.

For privacy, we installed pocket doors. There are dual A/C units and wall mounted electric heaters. LED scene lighting is installed on the exterior of the trailer as well.

COVID RESPONSE TRAILER - Large

Does your healthcare organization need a mobile solution that brings mobile COVID-19 testing and/or vaccination distribution to the locals in your community? This fully equipped trailer has all the capabilities of a conventional clinic but in a mobile package that can be set up in minutes.

This 40ft. gooseneck style trailer features a reception area, two patient rooms with privacy doors, physician stools, exam lights, fixed bench seating and more. The triple axle trailer offers a spacious interior, power retractable awning and other useful features.

"Mobile testing and vaccination locations can be simplified with a self-sustaining trailer such as this one. This gooseneck trailer features on-board generator, lavatory, galley, patient rooms and more to make it completely self sustaining on site," **says LDV Sales Specialist, Ed Cook.**

COVID RESPONSE VEHICLE

This mobile testing and vaccination vehicle is completely self-sustaining. The vehicle can be sent out and set up quickly as a mobile testing site or to administer the COVID-19 vaccine. It has the ability to carry additional staff members and is equipped with a vehicle leveling system to provide a stable workspace.

The vehicle features an exterior monitor compartment, interior waiting area, two patient exam rooms, pressurized water supply, lavatory, medical grade refrigerators, custom aluminum cabinetry and an electric pneumatic wheelchair lift. As summer approaches, the dual lateral arm awnings can be deployed to provide shade for patients.

"This custom COVID-19 vehicle is equipped with everything needed to operate as a standalone unit. Organizations can deploy the vehicle quickly to conduct coronavirus testing or to distribute the COVID-19 vaccination in one of the two patient rooms," **says LDV Sales Specialist, Ed Cook.**
